You'll be surprised at what you have the stock of goods, with the exception of Bennett. The loss will approximate \$100,000.

Bosrox, January 13.—The most extensive fire of the new year broke out yesterday morning in the five-story granite block on Clinton Street, owned by the Jane E. Quincy estate, and known as the Clinton Block. It is a substantial structure, and is occupied, in the lower portions throughout, by produce and truit commission firms, and in the upper portions as storage warerooms. The fire started in the store of 8. T. Fletcher, on the first floor. The flames spread to the adjoining building, and soon the block was a mass of flames. Loss about \$100,000.

A more important piece of political news is a Cairo dispatch announcing that the Khediwe has recognized the Sultan's surerainty in a practical way, by requesting his aid in restoring the authority of the Egyptian Government in the Soudan. The action gives a fresh proof of the complete ascendancy of England in the administration of Egyptian affairs. It really means, according to the current interpretation of it, that Lord Salisbury intends to use Turkey to do England's fighting in the Soudan. The Sultan will gladly send his troops to the Soudan, proving thereby to the whole Mohammedan world the reality of his soveriegnty over his dominions. Lord Salisbury thus protects the interest of the British holders of Egyptian surities in an expensive way by appealing to the Sultan's vanity. The British troops at present in Lower Egypt, under General Stephenson, will be sufficient to guard the frontier, and it is probable that the order to send forward re-inforcements from England will be counter.

These are now be-lieved to contain arms and cartridges to be lieved to contain arms and cartridges to be used in a general uprising. The plans of the conspirators were completely arranged by last Sunday. Many soldiers of the St. Julien garrison had promised their assistance provided that the attacking party came in respectable force. Just after midnight several boat loads of men left the schooner and landed at different wharves in Carthagena. They concentrated at the fortress and carried the outer works with hardly a show of resistance. They had reached the parade inside of the fort before a general alarm was given.

alarm was given.

The whole garrison was called out, but as they came from their barracks the officers were shot by skillful marksmen among the rebels. The officer who was most seriously wounded is General Fajardo, the Military Governor and commander of the fortress. He will probably die. After delivering their first round of shot the conspirators escaped through a sally port which had been left open for that purpose. None of them were captured, and there is no evidence that any of them were even wounded. They hastily re-embarked on their schooner and put to sea. A main-of-war was sent in pursuit in the afternoon.
